

Staying healthy & strong during COVID-19

Know that your role in managing COVID-19 is a very important responsibility. This is time to take care of your own physical, mental and spiritual wellbeing so that you can be strong and care for others, both family and community.

Practice physical distancing
Keep at least a 2 meter distance apart when in public spaces.

Practice good hygiene
Wash your hands thoroughly with soap and water

Self isolate and quarantine if and when necessary

Try to eat, sleep well and exercise if you can
Eat smaller, more often – remember to drink water.
Exercise – simple as stretching, fresh air and at least 6 hours sleep or rest when you can.

Stay as informed as much as you can
But don't overwhelm yourself.

Embrace reflective practice
Use journals, diaries, drawing, poetry.

Keeping your family well and safe
Understand the importance of staying at home.

Stay connected, stronger together
Network with other Indigenous health professionals.

Make your needs a priority
We will get through this.
